

Count on Fenner Drives. We've got the right product for you.

Urethane Belting and O-Rings

The most comprehensive range of urethane belting and O-rings available, including Eagle Orange™ 85. All standard V-, round, and flat profiles are in stock, right here, right now, ready to go to you. Our belts are easily made endless in the field with Fenner Drives welding kits. Custom profiles are also our specialty.

Composite V-Belt Sheaves, Idler Pulleys & Sprockets

High strength, high performance glass-reinforced nylon makes our V-belt sheaves, idler pulleys and sprockets extremely durable yet light weight and corrosion resistant. A cost effective alternative to conventional metal parts. Available in a wide range of stock sizes for V-, round, and flat belts and industry standard pitch chains. Use with a T-Max tensioner for an off the shelf drive tensioning solution.

Polyester/Polyurethane Composite V-Belts

A quick to install, easy to inventory, permanent replacement for conventional endless rubber V-belts. Industry standard horsepower ratings. Reduce drive downtime: PowerTwist Plus V-Belts can be installed in seconds without tools or dismantling drives. Available in all standard classical V-sections. With red PowerTwist Plus, you always have the right V-belt on hand — 24/7.

Belt & Chain Tensioning Systems

Automatically take up the slack with T-Max Belt and Chain Tensioners. Improve drive efficiency and extend component life with proper tension. A variety of design and size options suitable for a wide range of power transmission/motion transfer applications. Introducing an industry first, the RT4000 for multiple V-belt drives and other high speed, heavy duty applications.

Keyless Bushings

Go keyless! The unique single locking nut design of black and gold Trantorque allows for “easy on, easy off” installation and repositioning of critical drive and motion transfer components. Off the shelf designs include standard GT; QC (interchangeable with QD bushings); S for mounting chain sprockets and MTO units for customer specific applications.

UHMW Belt & Chain Guides

Fight friction and extend belt or chain life with Trackstar UHMW guides. A wide variety of standard profiles are available for all industry standard V-, round, and flat belts and single and double pitch chains. Manufactured to exacting tolerances and always in stock ready to ship to you today; whether one stick or a hundred, call us: we've got it! Custom profiles are also our specialty.

Innovative Components Solving Traditional Problems in Power Transmission and Motion Transfer

Fenner Drives has developed a unique portfolio of products for power transmission, motion transfer and conveying applications.

We give you **The Power of One** as your single source for all these components.

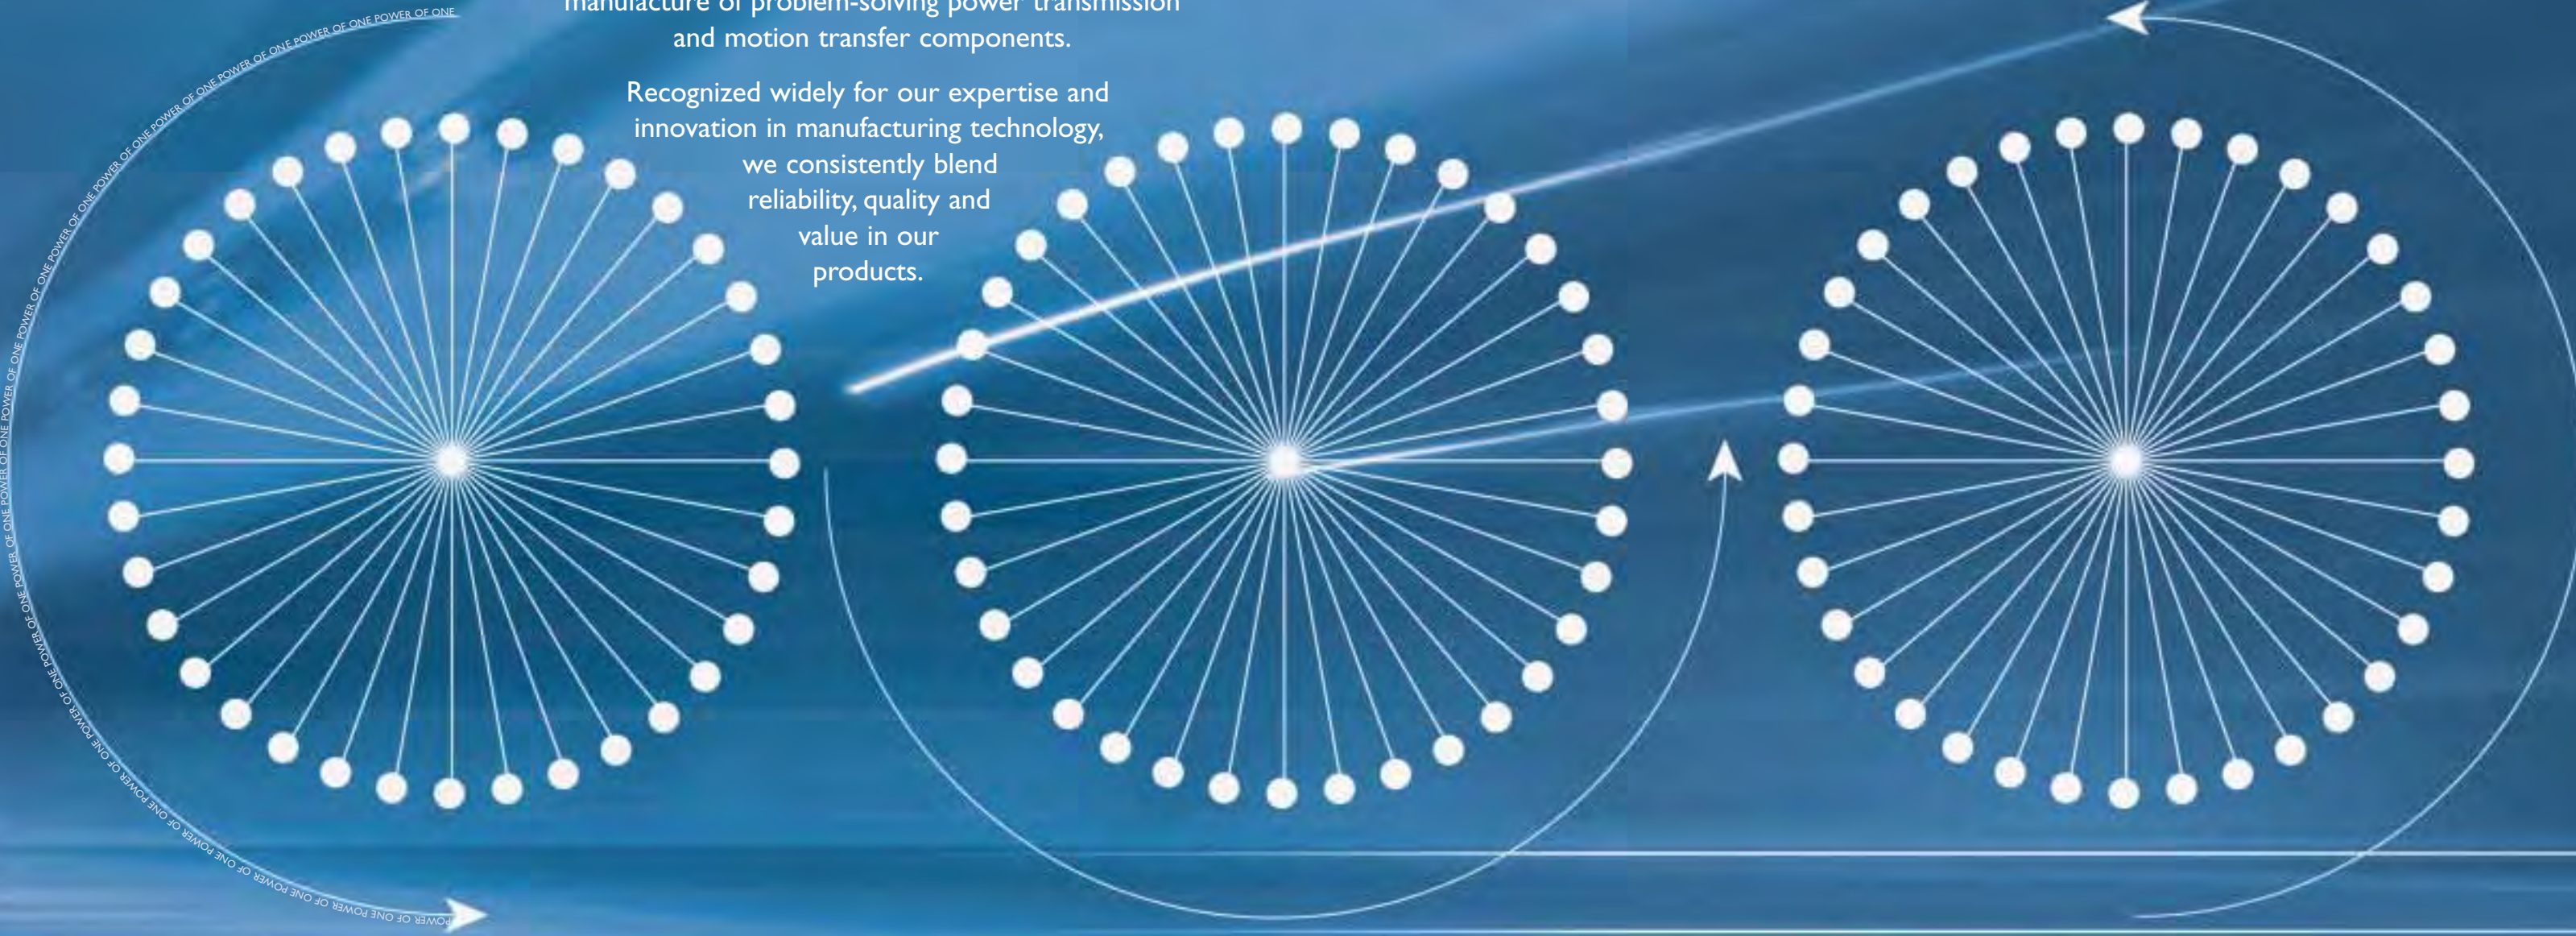

And if our design advantages weren't enough, there's the product availability advantage:

our stock items are all on the shelf, ready to ship to you today.

Have a special or unusual application? We have extensive in-house engineering support, ready to advise you or design a custom solution.

Fenner Drives is a proven leader in the design and manufacture of problem-solving power transmission and motion transfer components.

Recognized widely for our expertise and innovation in manufacturing technology, we consistently blend reliability, quality and value in our products.
